

CHECKLIST

9 checks before approving a flame-retardant fabric

For contract, hospitality and public-space projects

01	FINAL APPLICATION Has the final application been clearly defined? Curtain, sheer, upholstery, wall covering or another use. ☐ Checked
02	FIRE SAFETY REQUIREMENTS Has the required standard, classification or test been confirmed? Requirements may vary depending on the country, space and final application. ☐ Checked Required standard: _____
03	LIGHT CONTROL AND PRIVACY Has the required level of light control been defined? ☐ Sheer ☐ Dimout ☐ Blackout ☐ Other: _____
04	CLEANING AND MAINTENANCE Has the recommended cleaning method been checked against the expected use conditions? ☐ Checked Expected method: _____
05	WIDTH AND MAKING-UP Is the fabric width suitable for the planned making-up and installation? Consider seams, joins, fabric consumption, waste and installation complexity. ☐ Checked Required width: _____
06	COLOUR FASTNESS Is the colour stability suitable for the expected exposure conditions? Consider daylight, artificial lighting, humidity and cleaning. ☐ Checked
07	STOCK AND LEAD TIME Have quantity, availability and required delivery date been confirmed? ☐ Stock confirmed ☐ Production required ☐ Lead time confirmed Quantity / Required date: _____
08	TECHNICAL DOCUMENTATION Is all the documentation required for approval available? ☐ Technical data sheet ☐ Certificates or test reports ☐ Care instructions ☐ Abrasion data, where relevant ☐ Colour fastness data
09	PERFORMANCE IN REAL USE Is there previous experience in comparable applications? Ask about references, use conditions, maintenance requirements, limitations and expected long-term performance. ☐ Checked

FINAL APPROVAL

- ☐ Visual approval
- ☐ Required standard validated
- ☐ Stock or production confirmed
- ☐ Lead time validated

- ☐ Technical approval
- ☐ Sample approved
- ☐ Documentation received
